

## Welcome to Dundrum Cosmetic Clinic

**You have a consultation to access your acne scars.**

Please come to your appointment with a clean face without sunscreen or any other creams that contains SPF. Do not use any sunscreen or creams with SPF for 12 hours prior to your appointment, as SPF interferes with the scan we will perform during your consultation.

In Dundrum Clinic we have a wide variety of techniques and laser equipment. We also have highly trained staff members, including qualified doctors.

According to your skin type and the type of scars you have, we will put in place a treatment schedule that will include various techniques. Because of the time it takes for your skin to repair itself between each session, your treatment will be carried out over various months.

We use the following equipment and techniques:

- Subcision
- Infini Microneedling RF
- TC Cross and Paint
- Medium Peel
- CO<sub>2</sub> Laser
- Pixel

These are just some of the techniques and equipment that we offer our clients.
